About us and what we do

**TOILET
CUBICLES**.co.uk

"for all your cubicle needs"

ToiletCubicles.co.uk was established in 1992 and since then has grown steadily. Years later we are now one of the leading Toilet Cubicle manufacturers and suppliers. We pride ourselves in the level of service we have to offer our clients, however large or small the project in hand. In 2001 we fully refurbished our factory, incorporating the very latest in cutting-edge machinery. These include state of the art edge banding facilities and up to the minute flat bonding technology. At ToiletCubicles.co.uk the commitment to our quality control procedures, the experience and expertise of our production team on the shop floor, always ensure the highest quality possible. Whether your requirements are for Cubicles, Vanity Units or Concealed Panelling, choosing our company is the right decision.

Sales team
www.toiletcubicles.co.uk

"Toilet Cubicles were there from day one all the way to completion on our new toilet refurbishments. They took the time to explain to me all I needed to know about the options available. Now that my first refurb was simple and looks great I'm looking to carry out the same improvements to my other premises."

Anthony Green
Headmaster - South Hill
Primary School

"A top finish and build quality, Toilet Cubes and the staff knew exactly what I needed, the end result was great!"

Versi-Cube

Cubicles

"The tried and tested Cubicle" - Robust and hard wearing, developed to withstand even the most demanding environments!

- Toilet cubicles
- Washrooms
- Shower rooms
- Changing rooms
- Anodised aluminium fittings to suit
- Designs made to your specifications
- Easily transportable, flat-pack system
- Disabled person's room
- Vanity tops and units
- Concealed panelling
- Available in over 20 colours

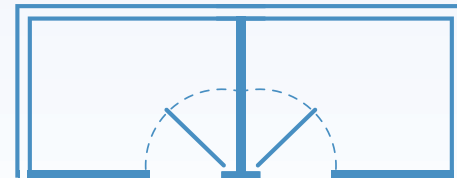

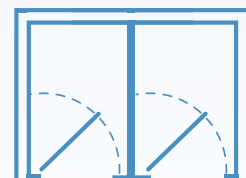

Costing and installation are easy but if you are not sure as to what is required, fax a sketch with sizes of the area and our office will contact you by return with a list of items required and price. Our estimate will include all items required to complete the installation.

We have used Toilet Cubes twice over the past five years for two of our major projects. In both instances they translated our architect's plans perfectly from the page to the actual finished bathroom. We have been delighted with the quality, speed and tidiness of their work"

Mark Poulter

Possible Layouts

Which of the following possible layouts best describes your washroom area?

Cubicle profiles

All Versi cubicles are manufactured using either 12mm Solid Compact Grade Laminate (CGL) with all edges chamfered and polished or 19mm Moisture Resistant Melamine Faced Chipboard (MFC) with all edges sealed using high impact 2mm PVC edging as standard.

Cubicle hardware and fittings for Versi-Cube

Satin Anodised Aluminium strong and tailor made to suit your needs

Long lasting Versi-Cube durable hinges

Strong stable adjustable legs

Slam proof and ridged U brackets

Versi-Cube Sprung Toilet Roll Holder

Aluminium hard wearing coat hook

Vacant/Engaged lock unit

Challenger-Cube

Cubicles

"A stylish yet practical alternative"
- Designed to meet the requirements
of a modern washroom

CHALLENGER
CUBE

- Toilet cubicles
- Washrooms
- Shower rooms
- Changing rooms
- Anodised aluminium fittings to suit
- Designs made to your specifications
- Easily transportable, flat-pack system

Similar to Versi-Cube, Challenger-Cube offers the same specification with its panels with a pleasant difference in its hard wearing and highly durable ironmongery.

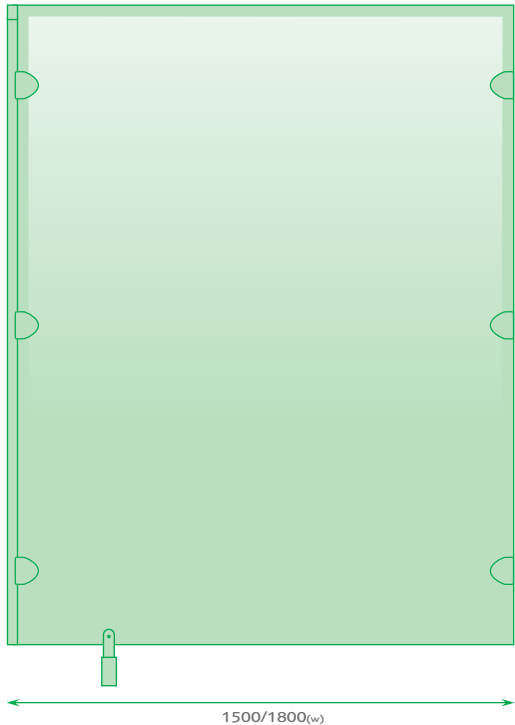

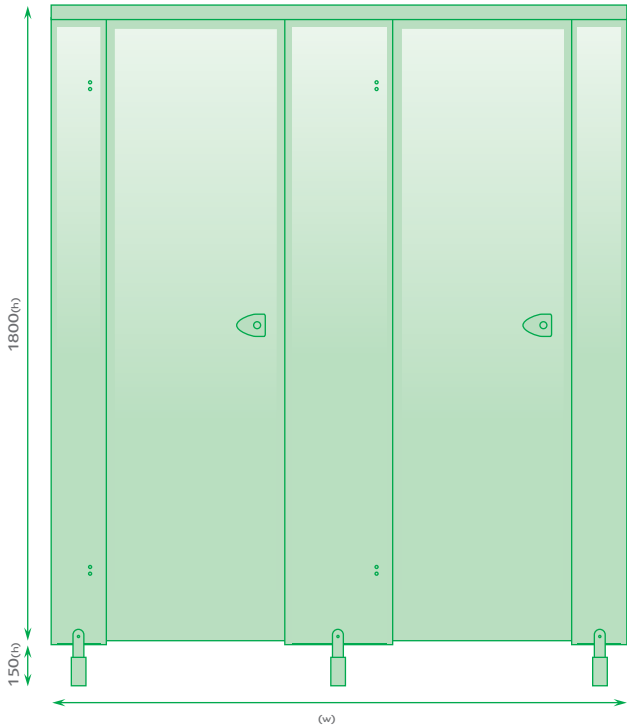

Challenger-Cube offers the ultimate in damage resistance for busy environments.

"Thank you so much for your help in the construction of our toilet areas! Your input was invaluable and we know the finished product would have never turned out so well without your efforts..."

Terrence Baltimore
Builder

Cubicle profiles

All Challenger cubicles are manufactured using either 12mm Solid Compact Grade Laminate (CGL) with all edges chamfered and polished or 19mm Moisture Resistant Melamine Faced Chipboard (MFC) with all edges sealed using high impact 2mm PVC edging as standard.

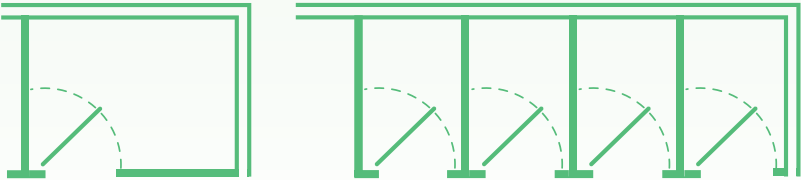

Cubicle hardware and fittings for Challenger-Cube

Satin Anodised Aluminium - a practical and hard wearing alternative

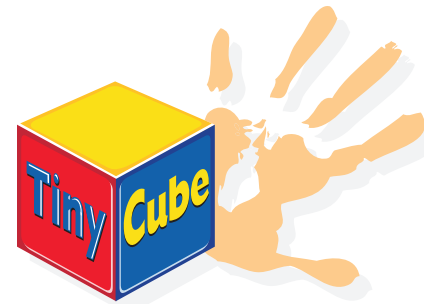

Possible Layouts

Which of the following possible layouts best describes your washroom area?

Tiny-Cube

Cubicles

Infant & Junior Height Cubicles

"With small hands in mind"
- Infant and Junior Height Cubicles, brightly coloured, incorporating smooth design lines

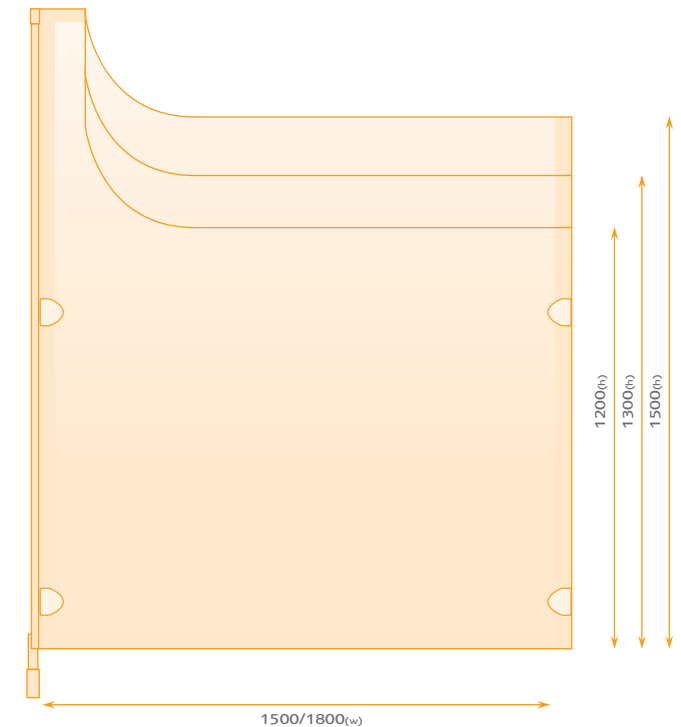

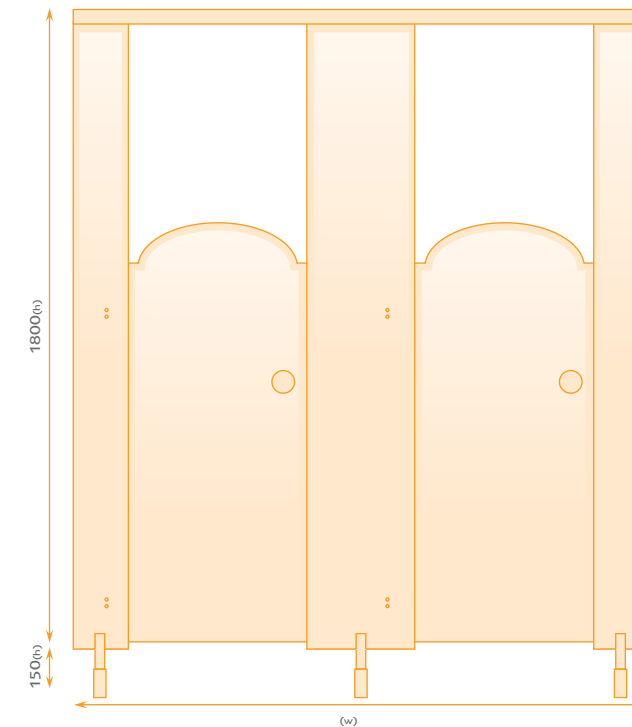

- Nursery schools
- Reception classes
- Schools
- Disabled rooms
- Changing rooms
- Washrooms

These children's height, brightly coloured low level cubicles, with smooth design lines and finishes, are enhanced by the uniquely engineered matching hardware and fittings, designed specially for small hands. Low level vanity units are also available to complete and complement your washroom designs.

Cubicle sizes and styles for Tiny-Cube

All Tiny cubicles are manufactured using either 12mm Solid Compact Grade Laminate (CGL) with all edges chamfered and polished or 19mm Moisture Resistant Melamine Faced Chip-board (MFC) with all edges sealed using high impact 2mm PVC edging as standard.

"Shaped low level doors provide greater supervision and with additional safety features such as anti-trap hinges and latches. Tiny-Cube cubicles are ideal for your child friendly washroom area"

Cubicle hardware and fittings for Tiny-Cube

Coloured Aluminium matching hardware and fittings specifically for small hands

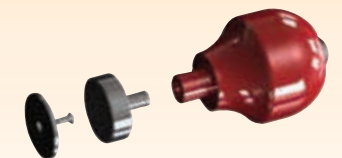

Easy emergency release mechanism

Tiny-Cube doors are available in various styles and different heights to suit your requirements.

"A familiar, fun and safe environment for young children. 100% safe to use, no sharp edges or corners"

Ideal-Cube

Cubicles

Simply "The finishing touch" - Incorporating the very latest in design and durability

**ideal
CUBE**

Eye catching curved aluminium mid and end fascias.

Finishes include polished, stainless steel effect, powder coated and textured paints.

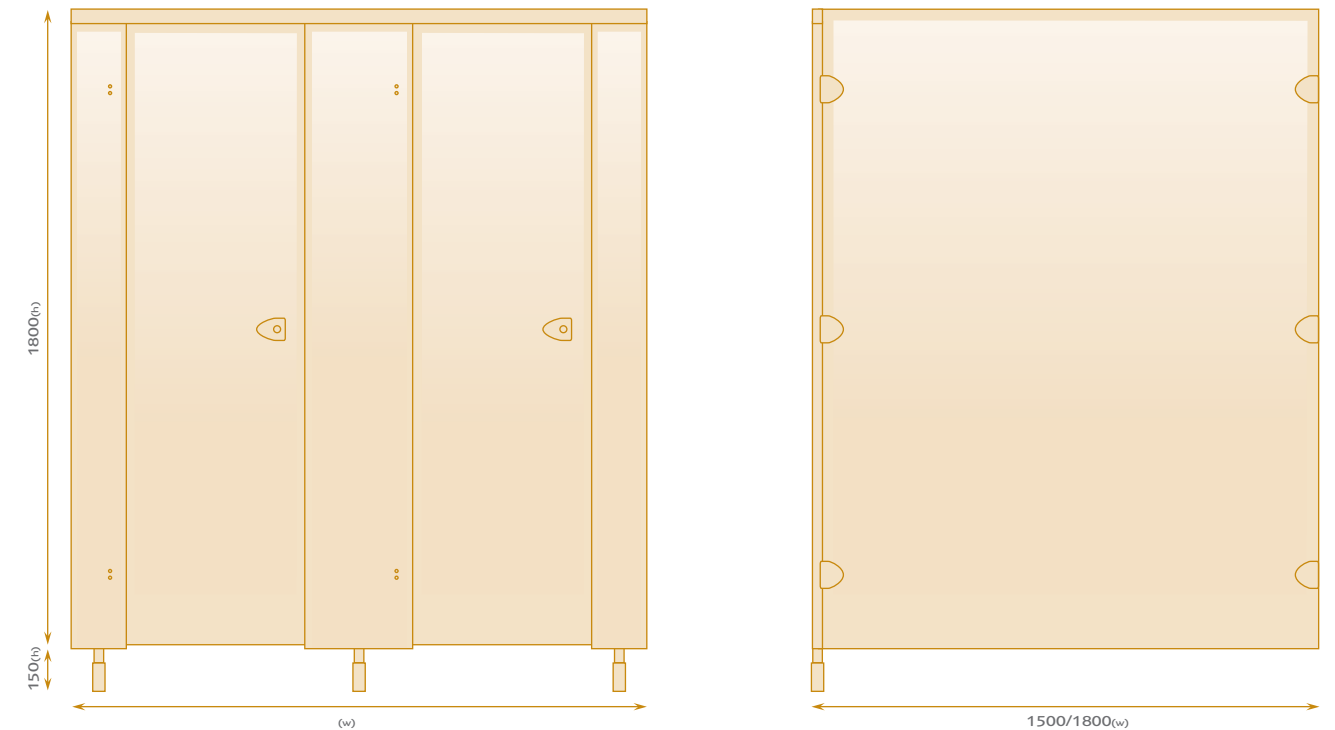

Working in close harmony, our design department and engineers have created a unique system, equally at home in the most prestigious of buildings as in the local leisure pool.

Ideal-Cube cubicles consist of a partition panel and door, combined with an elliptical aluminium fascia. The shape of the fascia gives an extra dimension to the cubicles and combined with a multitude of finishes, allows you to create your own individual design.

Strong, curved aluminium profiles and colour co-ordinated panels, produce a most striking visual effect.

Cubicle profiles

The Ideal cubicles are manufactured using either 12mm Solid Compact Grade Laminate (CGL) with all edges chamfered and polished or 19mm Moisture Resistant Melamine Faced Chipboard (MFC) with all edges sealed using high impact 2mm PVC edging as standard.

Cubicle hardware and fittings for Ideal-Cube

Durable and modern, metallic textured, powder coated ironmongery.

Robust and shock resistant lock

Vacant/Engaged lock unit

Slam proof and ridged U brackets

Strong stable adjustable legs

Headrail

Hat and Coat Hook

Possible finishes

Other coloured textured finishes are available at an increased cost and over an extended lead time

"It was a pleasure to have your workmen here and to take full advantage of their extensive knowledge. I would recommend your company without reservation"

*Nicola Tate, Head Teacher,
East Field Lower School*

"Sleek and tidy" - Our contemporary made to measure duct panelling system is designed to integrate into any one of our Cubicle ranges

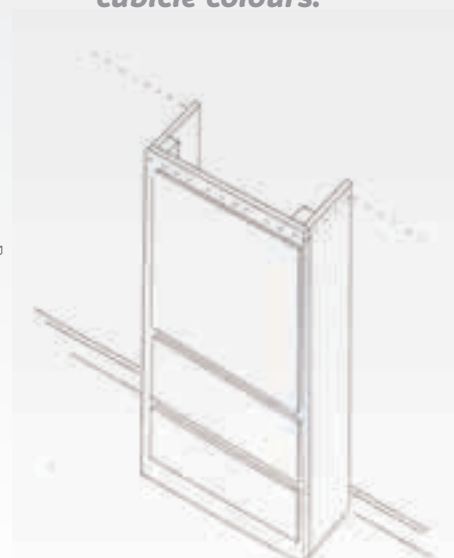

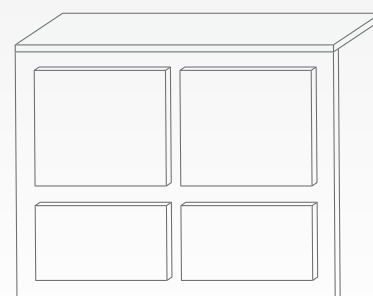

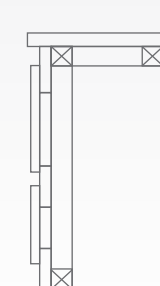

Concealed panelling sets are made to suit site conditions and overall sizes available. If in doubt, our technical staff will be able to supply full specifications to suit your needs.

Full height or low level concealed cistern panelling can be manufactured and supplied to match your cubicle design and colours.

20mm Moisture Resistant, Melamine faced chipboard panels with integrated 2mm hardwearing PVC edging all round as standard.

Our full or half-height Concealed panelling systems can be supplied to match any of our toilet cubicle colours.

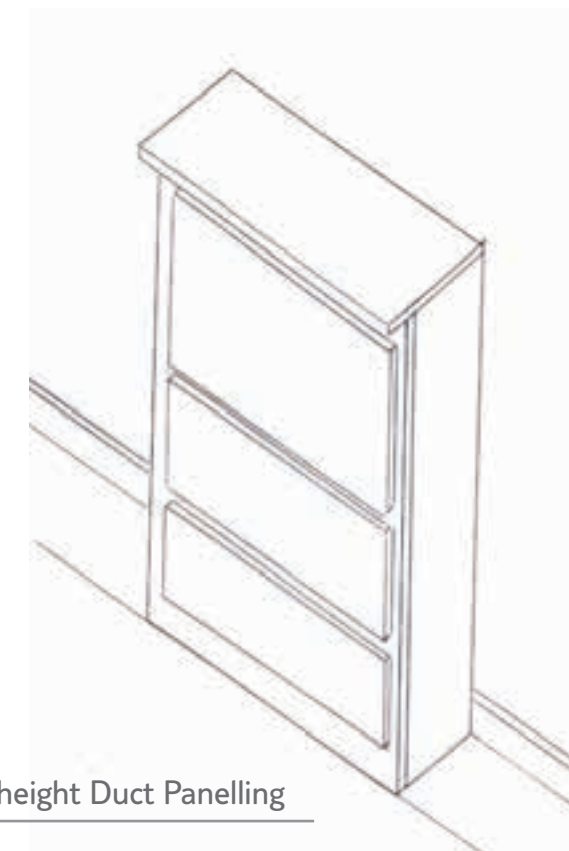

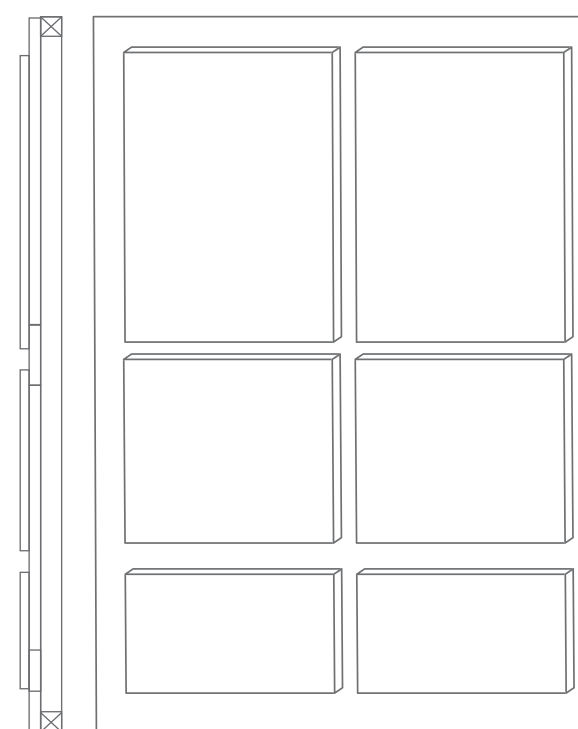

Half height Duct Panelling

Concealed Panelling Specification / Material Options

All our panels are manufactured from 19mm Melamine Faced Chipboard as standard, with an integral 2mm PVC edging all round. Concealed panel kits are supplied in flat-pack form, complete with relevant lift on / off clips.

Please Note: Timber studwork is always supplied by others. Installing our panel kits is a very cost effective option as they put an end to continual redecoration and solve the problem of unsightly marks caused by every day knocks, our panels are hard wearing, hygienic and very easy to clean.

Full height Duct Panelling

Hardware and fittings for Duct Panelling

Lift off and push fit panel clips are used to secure flat panels to hidden frames. They provide a simple but effective means of concealing hidden pipework and services.

Typically there are four sets of clips fitted to a panel and the matching four clips fitted to the framework.

Push fit clips

Lift On/Off clips

Toilet Cubicles.co.uk supply the clips packed on cards in sets of four, complete with all screws. This avoids the need to send bulk packs to site as well as time consuming counting.

***"Transforming any washroom environment"
- Our great range of inspiring yet functional
Vanity Units will provide the solution
to your vanity requirements***

All Vanity Units are made to measure and are available for either a semi-recessed wash hand basin or a fully-inset wash handbasin.

Available in matching cubicle colours from our extensive range.

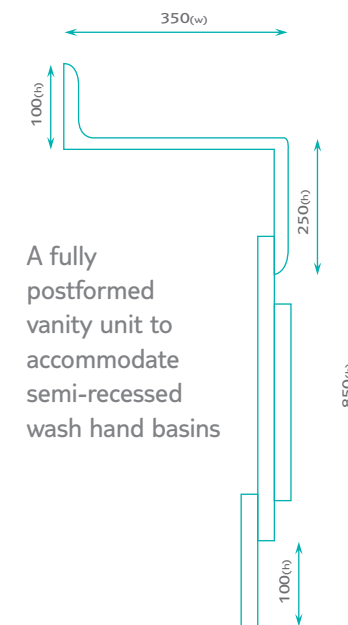

Vanity tops are 20mm thick with a High Pressure Laminate finish, under panels are constructed from high performance Moisture Resistant, Melamine faced chipboard as standard.

Vanity Units are supplied pre-built, however if access is restricted they can be supplied in kit form.

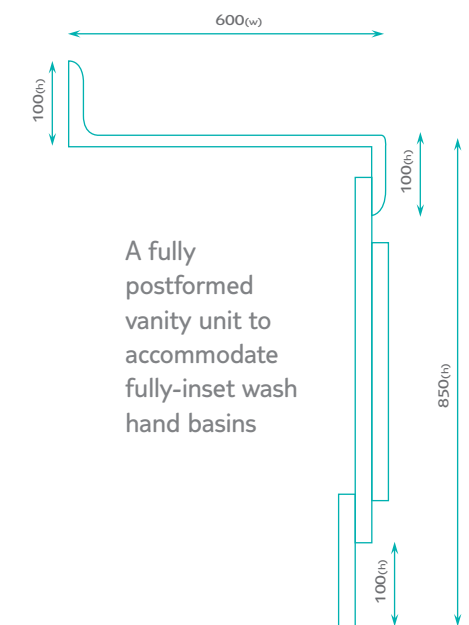

Vanity Unit Specification / Material Options

Vanity tops are 19mm thick moisture resistant, medium density fibreboard, laminated with a High Pressure Laminate. Removable panels are constructed from 19mm high performance melamine faced chipboard as standard. Vanity Unit height is 850mm as standard, however, like most of our products, this can be manufactured to suit your individual requirements.

Semi-Recessed Unit

Fully-Inset Unit

All our Vanity Units are supplied pre-assembled but can be transported in kit form if necessary. Vanity units can be manufactured in a wide range of finishes and styles to suit individual applications. All our Vanity Units are tailor-made and designed to complement any of our cubicle ranges.

General Information

Our technical team are able to offer advice and support throughout the whole process from initial selection to installation. As with all our systems, full technical manuals and installation guides are available.

Costing and installation are easy but if you are not sure what is required, fax or email a sketch with dimensions of the area and one of our sales team will contact you by return with a list of items required.

For a free, no-obligation quotation why not fax or email your dimensions to us. Alternatively one of our sales team would be pleased to discuss any queries you may have over the phone or on site.
